

Vertical Skills Engineer Construction Kits

We understand the military's unique kitting needs for Vertical Skills Engineer Construction Kits (VSECK) kits. From simple bagging and specialized kit boxes to large, complex kits for tactical and specialized applications like engineering and carpentry, we provide solutions customized to meet our customers' needs.

- Designed as a complete solution for engineering and carpentry applications
- Berry-compliant
- TAA-compliant

TYPE I Carpenters Tool Kit Squad

Intended for use by combat engineers doing general carpentry tasks.

TYPE II Carpenters Supplemental Tool Kit

Intended for use by combat engineers doing general carpentry tasks.

TYPE III Carpenters Tool Kit

Intended for use by combat engineers doing general carpentry tasks. Comprised of three subsets of tools: Pneumatic; Table Saw and Router; Multi-Saw and Drill.

TYPE IV Electricians Tool Kit

Intended for use by combat engineers doing electrician operations.

TYPE V Mason and Concrete Tool Kit

Intended for use by combat engineers doing concrete and masonry operations.

TYPE VI Plumbers and Pipefitters Tool Kit

Intended for use by combat engineers doing plumbing and pipe fitting operations.

End-to-End Kitting Capabilities

Offering end-to-end management of complex kitting programs, our team has over 40 years of experience—and we expertly develop cost and pricing data that follows FAR guidelines. This helps us further refine and execute our bid and proposal process. We also offer strategic sourcing efforts and proactively coordinate assets to optimize the delivery of goods, services, and information from supplier to customer.

Our process

Our kitting capabilities aren't just comprehensive, they're unmatched. We are currently producing 4 major kitting programs for the military which provide the solutions for any and all requirements; deployments, domestic operations, training, and more.

Accuracy. Assurance.

Our engineering and quality teams work diligently on everything from tool kit layout and design to packaging and labeling for MIL-STD-129 and 130. Organized and efficient, our procurement team uses the Oracle ERP system to track and trace acquisitions from sales and purchase orders to receipt of goods. Within our 100,000 sq ft kitting facility, all inventory is electronically tracked in real-time using Oracle Warehouse Management Software.

Quality down to the last detail

Our kitting associates who are blind or visually impaired are fully trained in compliance with our Quality Management System and use a variety of adaptive tools to aid them in kit assembly. This is reflected in our ISO-certified quality process and strong CPAR ratings due to our partnership with DCMA.

OUR MISSION

IBVI exists to create and sustain jobs for those who are blind or visually impaired. As a certified US AbilityOne® provider, we employ over 125 people who are blind or visually impaired across our four Wisconsin facilities and 15 military-base supply stores throughout the country. At IBVI, our employees make us who we are. Without them, we wouldn't be able to serve our customers, our country.
